

# Quad-State Trail Vision

A trail *network* is far more powerful than a series of un-connected individual trails.

	<b>Mileage (longest connected)</b>	<b>Population (within 2-3 miles of system)</b>	<b>Annual Economic Impact</b>
Current:	225 miles	210,000	\$25 million +
5 years:	300 miles	350,000	\$45 million +
20 years:	1000+ miles	4 million+	\$500 million +

## Proposed 4 state trail

*Of the routes shown, some exist, some are under construction, some are planned, and some are proposed. Route placement is illustrative of potential connections only and not precise. Economic impact estimates are conservative and based on linear growth; experience with other trail systems is that connecting trail networks to create a complete system accelerates growth well beyond linear.*
